

The sizing of jumpers of Aerower synthesizes the most common sizes in five, and thanks to its padded inner liner, offers you great comfort in every jump.

To know your Aerower size, print this sheet, place it on the floor and adjust the dotted line against the wall. To do this, you must cut or fold the paper along this line.

> Place your left foot on top of the sheet, resting your heel against the wall and it must coincide with the heel of the picture. Look at your toes and check which line is in front of your foot without your fingers covering it. That's your Aerower size!

.....

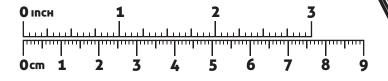

Rest your heel
